The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate. The peak time-of-use (TOU) rates can be double the price compared to off-peak rates. In such a scenario, a solar battery storage system can come in handy for using electricity without having to pay such a high price.

Solar panel installations: Solar panel installations on residential roofs, offering reliable, cost-effective energy solutions. Solar home systems: Pre-packaged solar kits with lighting, telephone charging and small appliances for rural and urban households.

Providing solar energy solutions for households and businesses is crucial to incorporating more Congolese people into electrical grids, but many in poorer, remote regions in the DRC also face the challenge of getting

Existing HEP could fill in the "gaps" when solar is not available. However offgrid power is essential in the rural areas and small towns across this vast country. Even with new solar and wind DRC could only satisfy between 15 and 55% of total demand. This leaves between 45% and 85% needing offgrid power or 16 gW of installed solar capacity !
