Albania teknoware central battery system

What is a Teknoware central battery system?
Teknoware's range of central battery systems starts with small systems containing just a few dozen luminaires and a single central battery unit up to centrally controlled systems containing thousands of luminaires.

How does Teknoware use BACnet?
Teknoware uses BACnet modules as an interface,to transfer BACnet objects from the Central Battery Systems and the luminaires. Battery and luminaire tests can also be initiated. PC software can be used to read the information of the Central Battery Systems through the BACnet bus. Also a separate COBA Software is needed for the PC.

What solutions does Teknoware offer?
Both centrally supplied and self-contained solutionsare available. We also supply a unique fibre optic Low Location Lighting system based on our own Optiline(TM) fibre. Teknoware also manufactures a range of central battery systems. In addition to the standard features,there is also available an automatic addressable testing system.

What is a tkt67 central battery system?
Central Battery Systems in the TKT67 series ofer efective solutions for supplying a large quantity of luminaires. They are especially suited for large premises. The central unit input voltage is 220-240 VAC. The output voltage is 220-240 VAC in normal mode and 216 VDC in battery mode.

How does Teknoware IC work?
Teknoware's IC (Intelligent Controller) system enables a large amount of diferent options,to turn the non-maintained emergency lights ON and OFF,by using voltage inputs,which can be freely chosen. At the same time,the voltage of several fuse boxes or general lighting can be monitored.

Do Teknoware luminaires need separate data cabling?
The testing of the luminaires is based on individual addresses,and the communication is by means of the power supply cables. Thus,there is no needfor any separate data cabling between the luminaires. The luminaires must be addressable,of the Teknoware products with the letter K in the end,or they must have a separate address module.

The central battery system is compatible with all of our 230 V addressable luminaires so you can replace an existing system with ease. The TKT7 series is an easy to adapt solution for locations which need different numbers of luminaires. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for ...

Teknoware offers a 230V AC/DC-based Central Battery System (CBS) consisting of control panels,

aesthetically appealing emergency and exit luminaires, sub-circuit monitoring modules, address modules to connect third-party luminaires ...

Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system. Teknoware"s entire product range is designed to meet the requirements of ...

CENTRAL BATTERY SYSTEM Central Battery Systems in the TKT67 series offer effective solutions for supplying a large quantity of luminaires. They are especially suited for large premises. The central unit input voltage is 220-240 VAC. The output voltage is 220-240 VAC in normal mode and 216 VDC in battery mode. The battery

The document provides information on Teknoware"s central battery units for emergency lighting systems, including their features, specifications, and monitoring options. Central battery units can operate at 230V or 24V, with ...

View and Download Teknoware TKT66 installation and maintenance instructions manual online. TAPSA CONTROL CENTRAL BATTERY UNIT FOR EMERGENCY LIGHTING. TKT66 portable generator pdf manual download.
