American Samoa aprovis energy systems

Who is aprovis Energy Systems GmbH?
Aprovis Energy Systems Gmbh - Specialist In Exhaust Gas And Gas Treatment Technology. In a very short space of time,APROVIS has established itself as an innovative energy company on both the national and the international market. Our expertise lies in exhaust gas and gas treatment technology.

Who is aprovis?
In a very short space of time,APROVIS has established itself as an innovative energy companyon both the national and the international market. Our expertise lies in exhaust gas and gas treatment technology. We are qualified specialists in our field - whether you need specific individual components or compact system solutions.

What is aprovis high temperature heat exchanger & aprovis gland steam condenser?
APROVIS high-temperature heat exchangers use the heat and energy from flue gases from industrial processes. APROVIS gland steam condensers are used for large steam turbines to recover the gland steam and energy. System solutions from APROVIS APROVIS is a specialist for system solutions.

Why do you need aprovis components & system solutions?
APROVIS components and system solutions are required in many applications. This is because APROVIS,as the sole provider in the combined heat and power(CHP) market,offers turn-key solutions for fuel gases of gas engines as well as complete systems for the exhaust gas duct of CHP units.

What is the difference between actico and aprovis process gas heat exchanger?
APROVIS ActiCo is for cleaning the dried gas from harmful substances by means of activated carbon filters. APROVIS process gas heat exchangers are for cooling or heating gases from different sources. Applications from low to high temperatures and pressures up to 160 bar. Exhaust gas technology

What is a aprovis heat recovery steam generator?
APROVIS heat recovery steam generators produce saturated steam up to 25 barwith energy from the waste gas of combined heat and power plants or other sources. APROVIS silencers are compact and offer optimum sound insulation. They cover low to high frequency ranges.

A la luz del reglamento sobre la ejecución de la ley alemana de inmisiones (44. BlmSchV), serán sobre todo los catalizadores SCR los que se verán afectados por una actualización. En dicha actualización se interviene en el catalizador SCR y también se implementan componentes integrados, como silenciadores o intercambiadores de calor para gas de escape.
