A milestone is a significant moment in a solar project worth memorializing. Aurora now allows you to mark a design with a milestone, allowing you to 1) quickly understand the progress of a project 2) decide which design to open and edit and 3) save a permanent, secure source of truth for what the design looked like at that milestone.

Shading can have a significant impact on the performance of PV systems so shading analysis is an essential step in solar design. Shading on a roof can come from a variety of factors, including trees, roof obstructions, neighboring buildings and self-shading from other roof faces.

The irradiance models that Aurora uses account for both direct and diffuse forms of irradiance. Though direct

beam irradiance is the most intense form of irradiance, it actually plays a backseat role to diffuse irradiance on overcast days and in other suboptimal conditions.
