Yes, it is possible to power an AC load without a battery using a solar panel power inverter. However, it is important to note that the inverter must be an inverter charger or a battery inverter. The solar panels should receive full sunlight to deliver a steady voltage, and the DC to DC converter should operate at the rated conversion voltage.

Solar inverters can track your panel array"s voltage and maximize the ongoing efficiency of your renewable solar energy system. Today"s premium inverters for homes are very efficient, and can typically transform DC ...
