Belarus trackso solar

What is trackso solar?

TrackSo Solar is a cloud based energy management IoT platformto track your solar PV system's performance,identify anomalies and provide immediate support,giving you a full control over your system without actually being present there.

What is trackso & IoT & energy management?

Trackso simplfies the way you operate and maintain your assets. IoT &Energy Management A cloud-based IoT platformto enable you to monitor,operate and maintain your energy systems remotely,giving you full power to optimize system performance and minimize maintenance costs. If playback doesn't begin shortly,try restarting your device.

How does trackso monitor a solar thermal system?

TrackSo provides performance based monitoringfor Solar Thermal Systems. How do we collect data of a Solar Thermal System ? A temperature probe is attached to : Controller is connected to monitor the pump.

What is trackso & how does it work?

Be the first to get notified of New Products,Services and Platform Updates. TrackSo is an IoT based SaaS productof Free Spirits Green Labs Pvt. Ltd. TrackSo monitors &manages energy assets to provide you with optimised information,hence allowing you to derive key business outcomes. Product is live since 2017.

TrackSo runs on the same infrastructure that Google uses internally for its end-user products, such as Google Search and . All data is encrypted in transit between Google, the customers, and the data centers.The data stored on persistent disks is encrypted under 256-bit AES and each encryption key is also encrypted with a set of regularly changed master keys.

TrackSo Solar. Introduction; Introduction. The section provide insights to the different modules of the Trackso platform. Each module including sites, units, mashups etc. are explained in detail for better understanding of the Trackso customers.

TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. Ltd. TrackSo monitors & manages energy assets to provide you with optimised information, hence allowing you to derive key business outcomes. Product is live since 2017.

A site on TrackSo Solar can have 5 no.s of users assigned to it. Users can be added with either admin or read only access type.Once a user is added to a site,it will appear in the "User Management" section with corresponding sites. List of ...

How is data acquisition from solar systems done by TrackSo; How to assign Static IP to TrackSo LAN Data

Logger; How to change Network Settings of TrackSo LAN Data Logger via Web UI; How to identify Network Status of your TrackSo IoT Gateway; How to read data from Solar Inverter or Meter on a Windows PC;

Learn and get started with the TrackSo for monitoring of your solar power systems ... TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. Ltd. TrackSo monitors & manages energy assets to provide you with optimised information, hence allowing you to derive key business outcomes. Product is live since 2017.

Learn how to use TrackSo Solar IoT Platform to monitor and analyse energy generation and performance of all your solar power plants. 2. Download Energy Reports. Learn how to download daily/monthly/yearly energy generation reports for your solar power plants. 3. ...

How TrackSo"s "Over the Air" feature will help you resolve the issue remotely? Once the TrackSo platform detects the initial indication of a problem, TrackSo"s "Over the Air" feature allows you to remotely address and resolve the issue without requiring physical intervention. OTA SMS Feature

A Solar PV monitoring system is a cloud-based platform that can collect critical parameters from your solar PV system and make it accessible to you anywhere, anytime through an interface ... Trackso"s remote monitoring system helps in gathering the following information from the inverters. Voltage, Current, Power and Energy on AC and DC sides;

Site Generation Analysis. Daily Energy - Energy of the plant for the current day.; Total Energy - Lifetime energy of the plant.; Output Active Power - Instantaneous power of the plant.; Specific Yield for the Day- Energy generated per kWp installed.; CUF for the Day : Capacity utilisation factor is the actual output from a solar plant to the maximum possible ...

We can monitor various points throughout a large solar loop, monitoring collector, tank, pipe temperature, as well as ambient temperatures, enabling quick and easy monitoring and ...

Reading installation & connection manuals before your visit your solar plant can help you install TrackSo remote monitoring system within minutes. We"ve tried our best to deliver all the important information necessary for you to configure your solar plant to work with TrackSo IoT gateway and platform with minimum hassle. We recommend you ...

The section explains how to complete sign up on TrackSo and create an account to monitor your Solar Power Plant. Following are the steps: Go to the TrackSo User Sign-Up Page or If you have received a Invitation email, click on Accept Request.; Enter your email and set your password.

Trackso simplfies the way you operate and maintain your assets. IoT & Energy Management A cloud-based IoT platform to enable you to monitor, operate and maintain your energy systems remotely, giving you full power to optimize ...

Belarus trackso solar

With TrackSo"s latest update we have enabled the feature to upload your company"s logo in your TrackSo account. Now every time you log in to the TrackSo portal you can see your company"s logo shining bright. Steps. Navigate to User > My Account in your TrackSo Account. Click on Update Logo field

Alarms section is yet another premium feature of Trackso platform, wherein a user can collectively witness the faults, anomaly occuring at the site level that can hamper the production of solar output. The alarm codes generated by the units/inverters are picked and interpreted efficiently by the Trackso platform for an extensive user experience.
