Belgium mie infrastructure

Quels sont les avantages du mie ?
Le MIE offre des subventions. Pour le volet "Transports",le taux de cofinancement peut atteindre 30 % des coûts éligibles,voire 50 % concernant les études,les actions prioritaires et celles à double usage civil et militaire. Ce taux s'élève à 85 % dans les pays bénéficiaires du Fonds de cohésion.

Quels sont les objectifs du mie ?
Dans le domaine des transports,l'objectif du MIE est de développer des projets pour des réseaux efficaces,interconnectés et multimodaux. Le programme soutient " des infrastructures pour une mobilité intelligente,interopérable,durable,inclusive,accessible et sûre ". Certaines parties du réseau doivent être adaptées à un usage militaire.

Qu'est-ce que le mie ?
Le MIE fournit également des financements sous forme de marchés publics. L'Agence exécutive européenne pour le climat,les infrastructures et l'environnement (CINEA),gère le programme MIE pour la Commission européenne. Le volet "Numérique" est sous la responsabilité de l'Agence exécutive européenne pour la santé et le numérique (HaDEA).

Belgium as the lower, under ground, reservoir of an UPSH plant and analyzes its hydraulic behavior. The abandoned slate mine consists of nine large chambers with a total volume of about 550,000 m. 3,
