# Brazil enphase encharge

The Enphase microinverter systems will be outfitted with Enphase Envoy(TM) communications gateways, which connect an Enphase-based solar system to the Enphase Enlighten(TM) monitoring platform and helps make per-panel energy monitoring and insights for operations and maintenance easy.

Enphase Energy, Inc. today announced that installers of Enphase® products in Brazil have seen a significant increase in deployments of residential solar energy systems powered by IQ7+(TM) and IQ7AM(TM) Microinverters.

"At Enphase, we take great pride in our collaboration with installers across Brasilia to deploy industry-leading solar energy systems," said Marco Krapels, vice president of international sales at Enphase Energy.
