GRID travelers installed solar systems on a rural off-grid community in Matagalpa, Nicaragua, home to more than 100 residents who earn their living from growing crops and raising livestock. Families cultivate corn, sorghum, and pasture, and many families raise livestock owned by farm owners in the nearby town of Ciudad Darío.

A chance meeting the clean energy and water poverty he witnessed during his travels across Nicaragua and Panama led Marc Henrich to create Solubrite. Now the solar-social enterprise startup is on the road with the aim of installing another 25,000 small home solar PV systems in rural communities across the two Central American countries.

The trip was very well guided, continuously fun and a full immersion into the Nicaraguan culture. Aside from the three days of doing the solar installation (no experience required) in the remote ...
