What is a cellcube energy storage device?
CellCube: The long-life vanadium-based energy storage deviceprovides an uninterrupted power supply. It is available with a power output of 10 to 200 kW and a scalable capacity in the MWh range. This means that covering the base load,capping electricity peaks and securing supply to sensitive areas can be achieved at all times.

What is the difference between suncarrier and cellcube?
SunCarrier: The SunCarrier is a unique tracking system which continuously aligns the surface of its modules with the current position of the sun. CellCube: The long-life vanadium-based energy storage device provides an uninterrupted power supply. It is available with a power output of 10 to 200 kW and a scalable capacity in the MWh range.

Is a cellcube a good investment?
WORTHWHILE INVESTMENT Efficiency is best expressed Especially if compared to diesel generators and conventional batteries, it quickly becomes clear that a CellCube pays off on a number of levels when it comes to the stable supply of telecommunications networks.
