Commercial ppa financing Indonesia

What is a 'corporate PPA' scheme in Indonesia?
However,the most frequently used "corporate PPA" scheme in Indonesia is a relatively straightforward operating lease arrangement,where a power developer leases its power plant to a consumer,with the rental fee being structured in a similar way to the conventional power purchase agreement with PLN. A typical structure is shown below:

Who is responsible for a PPA in Indonesia?
In the context of a PPA,the only two parties to the agreement are a private sector developer and a state-owned utility. Accordingly,the traditional risk allocation is that the state-owned entity should take responsibility for actions of the State. On this basis,the PPA models used in Indonesia to date have largely provided that:

Is PPA disclosure legal in Indonesia?
No regulations or policies mandate or prohibit PPA disclosure. Indonesia's state-owned power company,PLN,publishes basic PPA information on its website. Since the adoption of MEMR Regulation No. 10 of 2017,national media outlets and the MEMR publicly announce most PPA signings.

What is CFPP PPA?
the termination of power purchase agreements(" CFPP PPA ") with independent power producers (IPP) for the supply of power by CFPPs,while taking into account power supply and demand conditions.

Which projects have been successful with the PPA model?
Recent flagship projects that demonstrate the success of the current PPA model include the Central Java 2 x 1000MW project,the Sarulla Geothermal Projectand many others.

Is Indonesia the first CPPA for onsite installations?
Amazon's AWS division launched its first cloud region in Indonesia in 2021,and the recent move is part of the company's efforts to decarbonize its operations globally,by 2025. While there have been other CPPAs for onsite installations in Indonesia,Enerdatics' research reveals that this is the country's first CPPA for offsite facilities.
