The cost of an off-grid solar system in St. Barthélemy will vary depending on the size of the system, the type of equipment, and the complexity of the installation. First, it can help you to save money on your electricity bills. Second, it can ...

To calculate the cost per watt of a solar energy system, divide the total cost of the system by the system''s capacity in watts. For example, if a 5 kW (5,000 watts) system costs $15,000, the cost per watt would be $15,000 divided by 5,000, which equals $3.00 per watt.

A key factor affecting cost is the size of the solar system you require. A small 1.5Kw system can generate 7 units of electricity. This system would require fewer panels than a much larger 5Kw system, that can generate 22 units of electricity. To give you a rough guide, a 1.5 Kw solar system costs in the region of $2,000, compared to a 5Kw ...
