Csp system Lebanon

In response, USAID"s Community Support Program (CSP) revolutionized the town"s backup electricity infrastructure by installing solar photovoltaic modules. By the end of January 2023, CSP had successfully tested and operated the system and is currently finalizing minor works before handing the system over to the municipality.

The town of Bchaale in North Lebanon is home to 2400 residents and is reputed for its scenic hiking trails that attract eco-tourists. However, the town lacks adequate infrastructure that properly mitigates its wastewater, which poses environmental and public health risks and negatively impacts tourism. In response, USAID"s Community Support Program (CSP) is constructing a
