Cyprus cold electric

How does Cyprus generate electricity?

Cyprus supports PV and biogas/biomassfor electricity production,while it also leans on onshore wind to achieve RES targets. Most RES electricity is connected through net-metering where it assumes energy is used for own consumption and surplus injected to the grid. Cyprus is currently not interconnected.

Where can I get electricity in Cyprus?

The Electricity Authority of Cyprus(EAC) are the only power supply company on the island. The EAC website has information in English on domestic account details,metre reading,bill paying and more. Connecting to the electricity supply involves a visit to the nearest Electricity Authority customer service centre.

Can you live in Cyprus if you don't have a heating system?

But the real problem becomes much bigger as the most apartments /houses in Cyprus do not have the central heating system. Therefore if you don't use any heating devices,your rooms will be absolutely uncomfortable to live. In Cyprus getting up in the morning sometimes turns into a test of fate.

What are Cyprus' energy goals?

For the heating and cooling sector,Cyprus foresees a target of 39.4%. In the transport sector,Cyprus plans to achieve 14% share of renewable energy by 2030. Cyprus supports PV and biogas/biomass for electricity production,while it also leans on onshore wind to achieve RES targets.

How to heat a home in Cyprus?

Warming up a room with an air conditioneris one of the most popular and (at the same time) the most financially expensive way to heat a home in Cyprus. Not everyone knows that in addition to cooling air conditioners are also capable of heating the air. The only problem is that most of them do not work at negative temperatures.

How does Cyprus support the energy sector?

For the heating and cooling sector,Cyprus supports solar thermal and use of heat. Finally the transport targets are planned to be met through electrification of transport and use of biofuels.
