Solar potential in the Czech Republic Solar panels in Prague. The Czech Republic had almost two gigawatts (GW) of photovoltaic capacity at the end of 2010, but installed less than 10 megawatts (MW) in 2011 due to the feed-in tariff being reduced by 25%, after installing almost 1,500 MW the year before. Installations increased to 109 MW in 2012.

The optics of implementing solar projects with agricultural land could help accelerate ground-mounted solar in Czechia, and with just half a per cent of the entire agricultural land, it would...
