Use Case: Ideal for small-scale applications where immediate, short-term power is critical, like home offices. Whole-House Battery Backup Systems. These systems are designed to power an entire household during outages. They are typically larger and provide a more extended backup duration than UPS units.

The link you shared is more of a potable power bank/"generator" as marketing calls it, and not a whole home system. Look at Victron (their website) for the system components, and just find a battery(s) that fits your power needs & budget (couple/few of these ought to do it). Lithium is the new wave and has many upsides, but you could also ...

If you have one inverter, the whole PV turns off and the house runs on battery-only until the batteries are low enough to charge with excess PV. If you have micro inverters, the system can turn off individual panels to match the draw from the house. This gets the most out of solar, and minimizes how hard the battery works during the day.

How Much Is a Solar Home Battery? Home battery storage projects start at $20k and can get more expensive from there. Add in solar, and quality solar battery storage system cost by licensed professionals can start at $35k and ...
