Energ2 com Cameroon

The key to EnerG2"s capabilities is our proprietary Carbon Technology Platform. Through rapid iteration of carbon morphologies and allotropes, we have identified the characteristics that are the most important to electrochemical storage systems - and the means to produce them at a commercial scale.

When was EnerG2 founded? EnerG2 was founded in 2003. Where is EnerG2 headquartered? EnerG2 is headquartered in Seattle, WA. What is the size of EnerG2? EnerG2 has 11 total employees. What industry is EnerG2 in? ...

With a total installed capacity of 1,292 MW, the mix of energy production of Cameroon consists of 57% of hydraulic power source, 21% of thermal springs in the gas, 10% of heat source to light fuel oil and 13% of heat source to heavy fuel oil.

EnerG2 Company Overview. The company, founded in 2003, developed its patented Carbon Technology Platform to enable large-scale production of carbon materials that surpass the limitations of the naturally occurring carbons traditionally used in energy storage applications.
