What is a Fehr honeycomb shelving system?
The fehr honeycomb shelving system is ideal for large quantities of rod and sheet materials- especially if high access speeds are necessary. This extremely efficient system works according to the principle of exchangeable cassettes and can be operated fully automatically and networked.

How does a Fehr satellite Stacker roll-over store work?
The fehr satellite stacker roll-over store does without load carriers completely. With the help of a storage and retrieval unit that runs on the bearing block,baskets and pallets from suppliers can be automatically transported just as easily as semi-finished products. The increased efficiency compared to standard solutions is up to 50 percent.

Why should you choose Fehr honeycomb warehousing system?
The fehr honeycomb system makes optimum use of the available space thanks to a minimum approach dimension,even with cassettes of different dimensions. No other warehousing system offers more capacity with such a small space requirement.

What is a Fehr Superlight materials buffer store?
Thanks to its compact design, the fehr honeycomb superlight materials buffer store allows an ideal use of the space where the room is restricted. The fehr satellite stacker roll-over store does without load carriers completely.
