Fire safety cabinet RÃ©union

What are fire safety cabinets?
Fire safety cabinets are designed to store various hazardous materials,such as flammable liquids,paint,gasoline and pesticides. Eagle flammable liquid cabinets come in different sizes and configurations to accommodate different volumes of hazardous materials.

Do flammable cabinets meet fire safety requirements?
This means that the flammable cabinet has been independently tested and meets fire safety requirementsfor intended use. A variety of flammable cabinets are available through Eagle,all of which meet OSHA 1910 and NFPA 30 requirements,and are available in capacities of two to 110 gallons.

Are flammable cabinets safe?
Flammable cabinets store flammable or combustible liquids safely. Eagle OSHA and NFPA 30 compliant fire cabinets are designed to offer safe,dependable protection from flammable liquids. Eagle fire cabinets may prevent fires and smother flames when used in combination with flammable liquid safety cans.

Are Justrite flammable storage cabinets safe?
Justrite flammable storage cabinets offer safe,dependable flammable liquid storage and protection. All cabinets meet OSHA and NFPA 30 requirements,and most are FM approved. These cabinets are available in a variety of styles,sizes and colors.

Are flammable storage cabinets code-compliant?
Protect workers, reduce fire risks, and improve productivity by storing flammable fuels and chemicals in code-compliant flammable storage safety cabinets.

Are flammable cabinets NFPA compliant?
All our metal cabinets meet NFPA Code 30and OSHA requirements. Flammable cabinets help keep flammable liquids near work areas safely. Constructed of 18-gauge steel,all cabinets feature reinforced double-wall construction with air space on the sides,top,bottom,back,and doors.
