The average daily solar radiation in Lesotho varies between 4.5 and 6.5 kWh/m 2, with some areas in the South West averaging over 7 kWh/m 2 /day. Under the UNDP/GEF-supported Lesotho Renewable Energy-Based Rural Electrification (LREBRE) Project, a total of 5000 solar home systems (SHS) will be installed by 2012.

The project aims to pilot Independent Power Producer (IPP) mini-grid technology in Lesotho, and demonstrate that they can be a superior sustainable solution for rural energy access. The successful mini-grid model that project partner Gram Oorja has applied in over 60 remote rural communities in India will be adapted to create an innovative ...

A solar PV system, also known as a solar photovoltaic system, harnesses the power of sunlight to generate electricity. Backup power systems such as UPS and inverters, are crucial for ensuring uninterrupted electricity supply during power outages or fluctuations.

The government is implementing 70MW solar electricity generation project at Ramarothole in Mafeteng. The project is financed through a soft loan from EXIM Bank of China, as well as Lesotho"s in-kind contribution. The Project will provide reliable access to modern renewable energy sources which will be connected to the grid.

Solar energy is playing a leading role in rural development in Lesotho and is moving into the mainstream of human livelihood, culture and technology in some parts of the region. Ivan Yaholnitsky, ex-MD of Bethel Business and Community Development Centre (BBCDC) describes solar energy development to date in the region.

With support from PREO, 1PWR was able to enhance local manufacturing capacity to deliver solar PV trackers, smart meters, and mini-grid Power houses to mini-grid electrification projects underway in Lesotho, thereby reducing the country"s reliance on panel imports, while supporting local value creation and employment.
