Why is Texel a strategic investment for the future?
This establishes TEXEL's solution as a strategic investment for the future,moving beyond traditional costs and the perpetual demand for supply. TEXEL has established itself as a global frontrunner in the realm of Stirling technology. Renowned for its scalability,this technology adeptly converts heat into electricity with high energy efficiency.

Is Ghana a good place to get electricity?
Thanks to strong government leadership since the 1990s,Ghana had an electricity access rate of 84% in 2018,one of the highest in sub-Saharan Africa. To reach the remaining population,grid densification (58% of the new connections) and stand-alone systems (27%) are the two main least-cost solutions in both scenarios. IEA. Licence: CC BY 4.0

How much power does Ghana have?
Ghana has a total installed capacity of 5,134 Megawatt (MW)for its existing plants,with a dependable capacity of 4,710 MW. The total power capacity is 5,134 MW. Thermal generation accounts for the largest share of Ghana's power generation,representing 66 percent,with hydro accounting for 33 percent.

What type of energy does Ghana use?
Ghana primarily uses natural gas for thermal power generation,but occasionally uses light crude oil and diesel. Ghana exports power to Togo,Benin,and Burkina Faso. The Government of Ghana remains heavily involved in the energy sector,with state entities having a controlling presence in the entire value chain.

How is the petroleum industry regulated in Ghana?
For the purposes of regulation in Ghana,the industry is divided into Upstream and downstream subsectorswhich cover activities from the exploration and production of petroleum through refining,storage,transportation,to the marketing of petroleum products. Aker Energy submits Plan of Development (PoD)
