Guernsey energy control system

What is the energy strategy for Guernsey?

The Committee for the Environment &Infrastructure is developing an Electricity Strategyfor Guernsey. The strategy will consider expected future energy demand levels and set out how this demand could be met,whilst also reviewing how the market structure will need to change to support this.

Will Guernsey's new electricity strategy come after a long-term deal?

A leading businessman has criticised Environment and Infrastructure's (E&I) new electricity strategy for Guernsey. Jon Moulton said the strategy should come after a long-term dealon power supply has been signed with French energy suppliers. The current deal for electricity supply with French energy supplier EDF is set to run out in 2027.

We've been providing energy solutions to the Channel Islands for almost 200 years.

What is the energy transition in Guernsey?

In Guernsey,we currently rely on fossil-fuel based systems of energy production and consumption and operate a thermal power station. However,it is recognised that as part of the response to climate change,there is a need to transition to an energy mix with limited,if not zero carbon emissions. This is often referred to as the energy transition.

Where does Guernsey's Electricity come from?

Currently around 93% of Guernsey's electricity is sent through a cable via Jersey,from France. Mrs de Sausmarez disagreed with Mr Moulton's approach and said E&I was not asking the States to approve a second undersea cable at this stage.

How can Guernsey support a vibrant economy?

Supporting a vibrant economy - A clean,reliable,and affordable energy supply is a fundamental economic enabler. Establishing an environment for the development of on-island (including offshore) renewableswill support the diversification and vibrancy of Guernsey's economy.
