Guinea-Bissau cornex energy

Can offshore Guinea-Bissau reshape the energy sector?
Offshore Guinea-Bissau is due to see some potentially transformative exploration drilling in the new future,and this drilling can have a great role in reshaping the energy sectorin the West African country.

Is Guinea-Bissau a viable energy resource?
The coast of Guinea-Bissau,with its deeply indented coastline,experiences high tidal range values making this a commercially viable energy resource. The highest mean annual tidal amplitude of 3.4 m was recorded at Porto Gole,on the banks of Rio Geba and could generate 50 MW of electricity (REEEP,2012); (DICAT,undated).

Who regulates the energy sector in Guinea Bissau?
The Ministry of Energy and Industryis in charge of both implementing policies in the energy sector and regulating them (Table 5). The National Electricity and Water Corporation (EAGB) manages the electricity sector in Guinea Bissau. On a regional level,the country is a member of the West African Power Pool.

How much electricity does Guinea Bissau use?
Guinea Bissau has a population of 1.75 million (Table 1). Total production of electricity in 2015 was 13 ktoe with all of it produced from fossil fuels (Table 2). Final consumption of electricity in the same year was 6 ktoe(AFREC,2015). Key consumption and production statistics are shown in Figures 2 and 3.

Is hydroelectricity a viable source of energy in Guinea-Bissau?
But by 2015 hydroelectricity was not still not an important source of energy. The coast of Guinea-Bissau,with its deeply indented coastline,experiences high tidal range values making this a commercially viable energy resource.

Does Guinea-Bissau have offshore exploration potential?
The underlying offshore exploration potential of Guinea-Bissau has long been recognizedgiven the country's functional hydrocarbon system,good potential reserves,and several drillable prospects in a vast shallow water shelf setting.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

Guinea-Bissau cornex energy

The electricity sub-sector in Guinea-Bissau remains one of the least efficient in West Africa. Serious challenges faced include: (i) discrepancies between supply and demand; (ii) waste resulting from obsolete distribution networks, with a loss rate of almost 47%; (iii) low investments; (iv) the poor commercial and financial performance of the national power utility; and (v) an ...

Energy use in Guinea-Bissau is roughly 0.3 toe per person per year, and is one of the world"s lowest. The biomass represents over 95% of the total energy consumed by households in Guinea Bissau. Wood is the dominant fuel with a demand that exceeds 500,000 tons per year, followed by charcoal being the most-used fuel in the capital.

Energy Situation and Priorities 1. Guinea-Bissau has a dual energy economy based on domestic wood-fuels and imported oil. About 90% of total energy consumption is accounted for by firewood and charcoal, which are used in almost all households for cooking as well as in traditional rural, commercial and artisanal activities.

PetroNor E& P, has entered has entered into a binding agreement to farm-out 100 per cent of its participating interest in its two exploration licences offshore Guinea-Bissau ...

The expected results in the energy sector are: installing 500 solar street lamps, reducing energy loss, finalising the 225-kV western backbone interconnection line in the Gambia basin and developing renewable energy. This will enable Guinea-Bissau to increase the contribution of renewable energy to its total supply mix from 0 to 36%.

The expected results in the energy sector are: installing 500 solar street lamps, reducing energy loss, finalising the 225-kV western backbone interconnection line in the Gambia basin and developing renewable energy. ...

BISSAU, 10 December 2018 - The Guinea Bissau Sustainable Energy International Conference was attended by 150 participants from Guinean public institutions, private sector, financiers, NGOs and academic institutions. The event was organized by the Government of Guinea Bissau, in partnership with the United Nations Industrial Development Organization (UNIDO), the ...

The west-African nation of Guinea-Bissau represents a particularly attractive market for energy explorers, owing to the largely unexplored on- and offshore basins. ... According to the ECOWAS Center for Renewable Energy and Energy Efficiency, Guinea-Bissau is the perfect destination for the testing and demonstration of grid-connected and mini ...
