Honduras store electric system

How much electricity does Honduras import?
In 2002,Honduras imported about 420 GW·hof electricity (more than 10% of its consumption) without any exports,thus making it a net importer of electricity. The overall electricity coverage is 69%. In rural areas it reaches only 45%,which contrast with the 94% coverage in urban areas (2006).

What type of power system does Honduras use?
With an installed generation capacity of 1,568 MW (2007),Honduras relies on a thermal-based power system(accounting for nearly two-thirds of its total installed capacity),which is very vulnerable to high and volatile international oil prices. [full citation needed]The generation mix is as follows:

Does Honduras need a 'energy Emergencia'?
Access to electricity in rural areas needs to be improved. In June 2007,the president of Honduras,Manuel Zelaya,declared an "energia emergencia". An Intervention Board (Junta Interventoria),headed by the Minister of Defence and the Minister of Finance,was temporarily put in charge of ENEE to address the crisis.

Does the Inter-American Development Bank support energy projects in Honduras?
Currently, the Inter-American Development Bank is contributing funds and assistance to the following projects in the energy sector in Honduras: An Energy Sector Support Loan supported through a US$29 million credit approved in September 2008. This project will finance priority investments in transmission and support a program for reducing losses.

What type of power plugs are used in Honduras?
In Honduras the residential power plugs and sockets are of type A and B. The standard voltage is 120 V and the standard frequency is 60 Hz. In Honduras,there is great potential in untapped indigenous renewable energy resources. Due to the likely long-term trend of high oil prices,such resources could be developed at competitive prices.
