Ignitis renewables Belarus

Ignitis Renewables is an international green energy company operating in the Baltics and Poland. It focuses on developing green generation and green flexibility technologies. By developing onshore and offshore wind, solar, battery and power-to-X technologies, the company is implementing Ignitis Group"s strategic priority to deliver 4-5 GW ...

Ignitis Renewables Annual Report 2023 Consolidated Annual Report for the year ended 31 December 2023, and the consolidated and the company"s financial statements for the year ended 31 December 2023 prepared according to the international Financial Reporting Standards, adopted by the European Union, and

At Ignitis Renewables, we are at the forefront of driving change in the renewable energy landscape of our region with our offshore wind projects. Offshore wind energy, harnessed from the powerful and consistent winds at sea, represents ...

Belgian speciality materials group Umicore SA has signed a long-term agreement to offtake a substantial part of the output of a 137-MW Polish onshore wind farm built by Ignitis Renewables, part of Lithuanian utility Ignitis Group .

Ignitis Renewables is implementing the strategic goal of Ignitis Group of reaching 4-5 GW of installed green generation capacity by 2030. This goal aligns with the goal of the European Green Deal to become climate-neutral continent by 2050.

We focus on developing green generation and green flexibility technologies. By developing onshore and offshore wind, solar, battery and power-to-X technologies, we are implementing Ignitis Group"s strategic priority to deliver 4-5 GW of installed green capacities by 2030.

At Ignitis Renewables, we are at the forefront of driving change in the renewable energy landscape of our region with our offshore wind projects. Offshore wind energy, harnessed from the powerful and consistent winds at sea, represents an extraordinary opportunity for sustainable power generation.

However, this renewable energy source can be harnessed even more efficiently by installing wind turbines offshore. An international green energy company, Ignitis Renewables, which is developing the largest wind energy projects in Lithuania and the Baltic States, explains why it is essential to generate green electricity both on land and at sea.
