Iraq tbg energy

What is the Iraq-French energy deal?
Image Credit: Bloomberg Baghdad: Iraq and French oil major TotalEnergies on Monday signed a long-delayed $27 billionenergy deal that aims to increase oil production and boost the country's capacity to produce energy with four oil,gas and renewables projects.

Is foreign help enough to fix Iraq's energy problems?
Foreign help is not enoughto fix energy issues,domestic reform is necessary. This past July,Iraq and France's TotalEnergies finalized the Gas Growth Integrated Project,a $27 billion energy deal aimed at Iraq's natural resources and improving the country's electricity supply.

What is Iraq's gas growth integrated project?
We compliment Iraq and Total Energies on the signing of a $27-billion energy deal that will accelerate Iraq's path to energy self-sufficiency and advance Iraq's collective climate change objectives. Years in the making,the Gas Growth Integrated Project aims to capture flared gas and deploy renewable energy sources.

What does the totalenergies deal mean for Iraq?
The TotalEnergies deal aims to help Iraq harness the natural gas emitted by its oil wells,achieve a more balanced energy portfolio,and address some of its domestic electricity shortages. It would also be significantly cheaper for Iraq to harness its own gas rather than to continue with its current agreement with Iran.

Why does totalenergies have a crisis in Iraq?
Recently,Iraq has become more critical for the gas company as TotalEnergies projects in Iran (negotiated in the late 1990s) and Syria (negotiated in 2008) are on hold because of sanctions.

Should Iraq trade oil for Iranian gas?
According to Prime Minister Mohammad Shia al-Sudani, by trading Iraqi oil for Iranian gas, Iraq would avoid power cuts in the summer while working on the deals to complete gas capture and extraction projects that would help make the country self-sufficient.

Iraq has been heavily reliant on Iranian goods and energy supplies, and officials from both sides reiterated their commitment to economic partnerships, which are seen as key to revitalizing Iraq"s economic recovery post-conflict.

(TBG) and 25% stake in ...

This is important because energy use is around 50% of the cost structure for desalination and Iraq continues efforts to reduce "barrel burn" in thermal power plants to free up oil for export. While the burning of fuel is used for MSF, both MSF and RO have high electricity requirements but even by this metric, RO is more efficient.
