Israel container generator

Can a containerised generator power a construction site?
At Dale,we have a wide range of containerised generator units that can power everything from a construction siteto a hospital and even large scale events. Dale's containerised generator units are able to offer bespoke designed solutions to meet your specific site requirements.

What is a containerised generator?
Containerised generators offer increased levels of weather protectionfor the generator unit in harsh environments. For example they're ideal for exposed locations,marine environment,oil and gas applications. As they're enclosed in a secure container that is usually a clean environment they often require less maintenance.

Why should you choose Jenbacher containerized gas power generation solutions?
Jenbacher containerized gas power generation solutions offer a variety of benefits to our customers, thanks to distinctive product features: See for yourself.

Can a diesel generator be used as a standby generator?
Excess usage: Most diesel generators are designed to provide backup power. Should a standby generator be used for prime power,care should be taken to ensure the generator is inspected frequently and only used for as long as it is required.

Can a diesel generator be used as a natural gas generator?
Diesel generators can be used to provide power to places that are not powered by a power grid or can be used as a backup in case of a power outage. Natural gas generators use natural gas however, and are used in both emergency and portable generator types.

What is the standard ventilation temperature for genset containers?
The standard ventilation is designed for ambient temperatures from -25°C to +34°C.All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options,both mechanical and electrical,are available to ensure that our containers meet the project requirements.
