Italia solar Jamaica

What are Jamaica's solar energy concessions?
With an ambitious goal to diversify its energy usage by 30% renewables by 2030, special concessions have been provided by the Jamaican government to solar energy companies such as Conserve It Jamaica, who aim to provide consumers with high quality solar based products and services.

What is the future of solar in Jamaica?
The future of Solar in Jamaica is brightas solar energy is accessible and affordable to everyone. Solar panels and Solar Water Heaters are more efficient and durable than ever..

How much solar irradiation does Jamaica have?
Jamaica has a high average solar irradiation of about 5 kWh/m2 per day,despite this abundance in solar energy in Jamaica,the country has relatively low penetration of solar based products and services,especially in the industrial and manufacturing sectors.

Will Jamaica increase its solar energy utility?
Another key indicator which highlights Jamaica's resolve to increase its solar energy utilityis where the country was one of the first small island developing states to become a party to the Paris Agreement of the United Nations Framework Convention on Climate Change.

Can a smart mobile device help Jamaica's solar energy industry?
The same is true of Jamaica's solar energy industry: where the vast majority of solar based products and services are confined to residential spaces, monitoring their usage to optimize energy outputs may be connected to a smart mobile device, which offers distant viewing of these solar based products and services.

What is Jamaica's energy policy?
In 2005,Jamaica formulated,then subsequently implemented what is known as the National Energy Policy 2009 - 2030,which,among other functions,is designed to promote 'diversification of Jamaica's energy supply to increase energy security and t contribute to the cost efficiency of the country's energy sector.'

ITALIA SOLARE è un ente del terzo settore che sostiene la difesa dell"ambiente e della salute umana supportando modalità intelligenti e sostenibili di produzione, stoccaggio, gestione e distribuzione dell"energia attraverso la generazione distribuita da fonti rinnovabili, in particolare fotovoltaico.
