Who is doing fusion research in Italy?
Magnetic confinement is also the most studied approach in Italy. Starting in the 1970s, the National Agency for New Technologies, Energy and Sustainable Development (ENEA) has built and operated a tokamak in Frascati that was then upgraded and eventually shut down in 2019.

Does EUROfusion support inertial fusion research?
Representatives of EUROfusion say that its main mission is to pursue magnetic confinement,and that it still supports some inertial fusion researchthrough additional funding schemes. "The inertial fusion research community should seek funding opportunities from the European Commission",says Tony Donné,EUROfusion programme manager.

Can inertial fusion be built in Europe?
In Europe inertial fusion researchers proposed the construction of a similar facility,called HiPER. A preliminary design was completed in 2008,but the project went nowhere. EURATOM and EUROfusion (the two programmes that fund fusion research in Europe) have devoted much of their investments and coordination efforts towards magnetic confinement.

Why is international fusion important?
International engagements promote and facilitate effective public-private partnerships around the world. In addition,timely commercial fusion deployment will benefit from early international coordination on regulatory frameworks and policy implementation to facilitate fusion's market entry.

Can fusion be a global commercial industry?
For fusion to be a global commercial industry,it must be possible for companies to export fusion technologies and fuel supplies. It will be beneficial to coordinate internationally as individual nations develop their domestic fusion regulatory frameworks,consistent with the highest standards of safety,security,and nonproliferation.

How can the United States accelerate commercial fusion deployment?
The United States intends to promote early international coordination on regulatory frameworks and policy implementation to pave the way for timely commercial fusion deployment through: Developing capacity building efforts to potential newcomers through workshops, webinars, technical consultancies, and site visits.
