# Jamaica optimal energy solutions

What is the nature of Jamaica's energy sector?
Jamaica's energy sector has been marked by high dependence on imported petroleum products,with 94 percent of all energy used coming from imports in 2008. The sector was also a combination of various private and public entities,leading to intricate decision-making processes and coordination challenges.

Could Jamaica have been able to achieve its goals without oil?
The Government of Jamaica recognized that they could not have achieved their energy efficiency and security goals to the extent noted without decreasing their oil dependency,which decreased from 95 percent (2010) to 71 percent (2017),and is expected to fall further,to approximately 50 percent,by the end of 2019.

How will Jamaica improve energy resiliency?
The government of Jamaica is implementing the new Electricity Act and issuing an Integrated Resource Plan to improve resiliencyas part of ongoing efforts. New cleaner power plants are expected to come online by 2020,replacing old,inefficient,oil-based power plants,thus reducing dependency on foreign oil.
