ENERCON began its road to economical / ecological success when graduate engineer Aloys Wobben founded the company in 1984. A small team of engineers developed the first E-15 / 16 wind turbine with a rated power of 55 kW. To start with, ENERCON systems still featured gearboxes. However in 1992, the changeover to gearless technology came about with the first ...

The ENERCON SCADA Server is the central component of the ENERCON SCADA system and is connected to the wind turbines via the wind farm"s fiber optic data bus system. It fulfills a variety of functions with regard to communication, data recording and control in the wind farm. With the ENERCON SCADA Remote software solution, you have the option of ...
