# Laos varta storage

Varta"s latest product, the Varta Wall, is a modular DC storage system available in 10, 15 and 20 kilowatt-hour capacities. This slim, wall-mountable storage system is compatible with leading inverters and ideal for households with solar panels.

Varta promises a higher energy density and a longer service life for the newly developed generation of lithium batteries. The batteries should also be more cost-effective and the recycling process simpler. The European Eco2Lib research project was therefore an ...

Arling: Profitable Electricity Storage through Intelligent Operation Management of Distributed Storage Units; Flexible electricity storage power plant; Gebrauchte Batterien als Stromspeicher (Gebäudeintegration von gebrauchten Batterien als 2nd-Life-Stromspeichersysteme)

With a VARTA energy storage system, you can temporarily store the energy you have produced yourself and use it when you actually need it. This way, you can use green energy 24 hours a day and increase your self-consumption to 80% and more.

Shows various information"s from the VARTA Batteries like current charge/discharge power, state of charge, maintenance informations, fan status, totals for consumption, power to grid and power from grid

VARTA energy storage system that you have at home apart from the rest, both now and in the future. Only high-quality thermally stable lithium-ion cells are used in VARTA energy storage systems, resulting in high efficiency and a long life without a performance-decreasing "memory" effect. We offer a ten-year warranty on our battery cells!
