Latvia apj energy

What are the different types of energy sources in Latvia?
Renewable energy here is the sum of hydropower,wind,solar,geothermal,modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal,crop waste,and other organic matter - is not included. This can be an important energy source in lower-income settings. Latvia: How much of the country's energy comes from nuclear power?

How much energy does Latvia use?
Latvia is a net energy importer. Primary energy use in Latvia was 49 TWh,or 22 TWh per million persons in 2009. In 2018,electricity consumption per capita was 3731 kWh. Latvia has adopted the EU target to produce 50% of its energy from renewable sources by 2030.

What is the main renewable resource in Latvia?
The main renewable resource is hydroelectric power. Latvia has laws that regulate the building of power plants and plans to sell electricity at higher prices. This is a stimulus for investment,especially taking into consideration the fact that Latvia cannot offer big subsidies in order to attract investment.

What is a hydro power station in Latvia?
Hydro is an important power source in Latvia,Kegums Hydroelectric Power Stationis the oldest hydro power station in the country,built in 1940. It was agreed in 2018 that Estonia,Latvia and Lithuania would connect to the European Union's electricity system and desynchronize from the Russian BRELL power system.

Is biomass a source of electricity in Latvia?
Traditional biomass - the burning of charcoal,crop waste,and other organic matter - is not included. This can be an important source in lower-income settings. Latvia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Can Latvia import natural gas from Russia?
From 1 January 2023 Latvia bannedthe import of natural gas from Russia. The replacement comes from connections to LNG terminals,the Klaipeda LNG terminal in Lithuania,and from 2024 the recently-opened Inkoo LNG terminal in Finland. JSC Conexus Baltic Grid is the natural gas transmission system operator in Latvia.
