# Lead power solutions Laos

ASEAN member Laos has plans to increase renewable energy in its power mix, notably solar power buildout. However, it continues to rely on hydropower and coal-fired power plants to generate electricity, complicating both its way forward and decarbonisation plans.

Listed below are the five largest active hydro power plants by capacity in Laos, according to GlobalData"s power plants database. GlobalData uses proprietary data and analytics to provide a complete picture of the global hydro power segment.

Several initiatives, including the ASEAN Power Grid (APG) and carbon capture, utilization, and storage (CCUS), took center stage as examples of ASEAN"s commitment to a sustainable energy transition.

"Empowering a sustainable future with diverse energy solutions - from hydro and solar to wind Phongsupthavy Group is at the forefront of clean, reliable, and innovative ...
