Liechtenstein liebert nxc

What is Liebert NXC?

Liebert NXC offer reliable and flexible secure power in a fully integrated package solution. It comes complete with highly efficient transformer-free double conversion technology providing installation and running cost savings. Minimizes installation costs by enabling the use of smaller generators,cabling and circuit breakers.

What is Liebert nxctm?

It comes complete with highly eficient transformer-free double conversion technology allowing it to provide installation and operating cost savings. With a rated output power factor of 0.9, the Liebert® NXCTM is also able to provide 11% more active power than a traditional 10-40 kVA UPS.

What is Liebert® NXC 80 - 200 kVA?

YOUR VISION,OUR PASSION. The Liebert® NXC 80 - 200 kVA range ofers reliable and flexible secure powerin a fully integrated package solution. Its highly eficient transformer-free double conversion technology delivers installation and running cost savings.

Why should you choose Liebert® NXC?

Its combination of performance features,multiple internal battery configurations and three phase/single phase output flexibility,make it an ideal choice for a wide range of applications from IT and manufacturing to retail and transport. Liebert® NXC offers reliable and flexible secure powerin a fully integrated package solution.

What is Liebert NXC ups?

Chapter 1 Product Introduction Liebert NXC UPS (UPS for short) is an intelligent online UPS system with sine wave outputdeveloped by Emerson Network Power. The UPS offers reliable and high quality AC power to the precision instrument.

How much power does a Liebert nxctm provide?

With a rated output power factor of 0.9,the Liebert® NXCTM is also able to provide 11% more active power than a traditional 10-40 kVAUPS. Liebert® NXCTM's combination of performance

La gamme Liebert® NXC 10 - 40 kVA offre une alimentation sécurisée, fiable et flexible en une seule solution entièrement intégrée. Elle bénéficie d"une technologie de double conversion sans transformateur à haut rendement qui permet de réaliser des économies d"installation et de fonctionnement.Liebert® NXC atteint un rendement de 95 % en mode double conversion et ...

The architecture of the Liebert® NformTM is designed to optimize installation and simplify service with

its easily power assembly. This architecture allow optimized MTTR & Maximize MTBF. Liebert NXC also comes equipped with casters to facilitate ease of ease of ® TM movement and relocation. Communication Connectivity cards LIEBERT NXC UPS® TM
