Nigeria, with the country representing 74% of regional sales and 20% growth compared to the second half of 2021. 152,000 units of key appliances were sold in the first half of 2022, a 60% increase on the previous reporting round. This is the first time half-year sales of appliances in West Africa exceeded sales in East Africa.

Our Solution Catalyze markets to deliver affordable, high-quality off-grid lighting and energy products. We support markets and governments in their contributions to achieving Sustainable Development Goal 7 - ensuring access to affordable, ...

Nigeria. Key regional takeaways o In East Africa, sales of solar energy kits reached close to 2.6 million units sold, a 15% increase compared to the first half of 2022. While sales in Kenya remained stable, they grew in many other markets including notable increases in Somalia, Malawi and Zambia. Key appliance sales for

The Lighting Africa program in Nigeria aims to help 5 million people not connected to the electricity grid access clean energy by 2017. This is expected to avert 100,000 metric tons of greenhouse gas emissions, associated with ...

For example, in Nigeria, a results-based financing (RBF) scheme, led by the Rural Electrification Agency and supported by the World Bank and African Development Bank, helped over 150,000 new households connect to off-grid solar between July and December 2021.

Our Solution Catalyze markets to deliver affordable, high-quality off-grid lighting and energy products. We support markets and governments in their contributions to achieving Sustainable Development Goal 7 - ensuring access to affordable, reliable, sustainable and modern energy for ...

Lighting Africa Program Kicks Off in Nigeria. The Lighting Africa program, a joint initiative of IFC and the World Bank, was today launched in Nigeria where it will help increase access to affordable, clean and safer lighting ...Read More

Nigeria country focus. The 2019 PAYGo MAI includes a country focus on Nigeria which explores market trends and business models in the PAYGo market, such as: o use of PAYGo technologies to serve urban

markets with unreliable grid connections o partnerships with mobile and financial services companies to deliver PAYGo services
