What is Finland's energy mix?

The emphasis in Finland's energy mix has been on renewable sourceslike biomass,hydro,and wind power. These measures are part of Finland's efforts to decrease energy intensity and improve energy security.

Finland"s approach includes nuclear energy, more renewables for electricity and heat, improved energy efficiency, and economy-wide electrification. After Russia"s 2022 invasion of Ukraine, Finland moved to cut Russian energy imports, which previously comprised 81% of crude oil, 75% of natural gas, and 19% of electricity imports in 2021.
