Malawi your energy solution

How will Energy Kiosks help low energy users in Malawi?
Energy kiosks will enable service deliveryto low energy users. The project aims to establish three Community Energy Service Companies in Malawi comprising of energy kiosks and solar mini-grids,thus providing access to energy services for small-scale farmers,households,clinics,schools and small businesses.

Is bioenergy a key energy source in Malawi?
For this reason,and to be in line with the SE4All Action Agenda,the MRES has identified targets for the percentage of bioethanol in petrol to reach 20% by 2025 and percentage of biodiesel in the total diesel supply to equal 30% by 2030 (Econoler,2016). Bioenergy has an important role as Malawi's main energy source.

How can we improve the sustainability of biomass fuel stock in Malawi?
The vast majority of Malawian households rely on firewood and biomass to provide energy,with the most energy intensive activity in the home being cooking. Therefore,one way to improve the sustainability of the available biomass fuel stock is to find ways to make the cooking process more efficient than it currently is.

How can Malawi improve the sustainability of transport fuel?
Given that there are already companies in Malawi producing bioethanol domestically,and the current rates of blending are not at their maximum level,a simple first step to increase the sustainability of transport fuel is to set regulated targets for blended ethanol with petrol to reach 20% by 2025.

Is it possible to live without electricity in Malawi?
We Believe it is Possible!90% of the Malawian population live without any access to affordable and reliable electricity and light.

Can a micro hydro scheme be replicated across Malawi?
It is hoped that these models will be replicated across Malawi. The Bondo Micro Hydro Scheme is an 80 kW development situated in Bondo Village on Mulanje Mountain. The scheme has taken a number of years to develop with funding from partners such as the UNDP,the European Commission and the Scottish Government.

At Solarise Africa, we pride ourselves in our ability to adapt and design unique energy solutions. Country or industry-specific needs, the nature of the equipment, as well as legal and tax requirements, can require unique solutions. The agreement terms are also flexible, depending on the affordability and cashflow of the business.

Speaking at the National Energy Conference in Lilongwe, Usi emphasized that energy generation is vital for national industrialization, a key pillar of the Malawi 2063 strategy. The conference serves as a platform for discussing solutions to Malawi"s energy challenges and taking stock of the country"s energy development progress.
