Mantis energy ltd Faroe Islands

Are there renewables in the Faroe Islands?
"In the Faroe Islands,we are blessed with renewables: we have wind,hydro and some sun in the summer; we also have tidal and wave power where we can see great potential," says Nielsen. Since announcing its green vision in 2014,SEV has already done a lot to increase the share of renewables in its energy mix.

What is the main industry in the Faroe Islands?
Fishingis,and has been for many decades,the main industry in the Faroe Islands with its products,including farmed salmon,representing more than 95% of total exports,and around 20% of Faroese GDP. "Producing fish meal and oil requires quite a lot of energy.

Will the Faroe Islands use more green energy in 2025?
Even more conservative scenarios predict that the Faroe Islands' current electricity consumption of approximately 350,000 MWh per year will increase to approximately 450,000 MWh in 2025. "The current discussion recommends using more green energyand especially the potential for wind energy is quite high," says one of the islanders.

Can a hybrid wind-hydrogen system be built in the Faroe Islands?
In this study, we look explicitly at the value--and challenges--involved with building a hybrid wind-hydrogen system in one of the Faroe Islands, Mykines. Mykines is currently powered by diesel generators and the island is furthermore isolated from the main grid.
