Mexico nanosun solar

What is nanosun & runergy & American Hyperion solar doing?

Nanosun and Runergy&American Hyperion Solar have unveiled a strategic global distribution agreement,which was formally signed during the RE+Vegas event. Pursuant to the agreement,both companies have committed to collaborate in the exploration of the photovoltaic market in Europe,the Middle East,and the United States.

What makes nanosun a good company?

Nanosun is a professional,and quick response organization. Wide availability of products,with fast delivery and good prices. They go the extra mile to meet customer and market demands. Doing business with nanosun was pleasant and very efficient; their consultancy was friendly and professional.

What is distributed solar energy in Mexico?

Distributed energy in Mexico is classified as any system with a capacity below 500 kW. The National Association of Solar Energy (ANES from the Spanish acronym) reported approximately 21,600 interconnection permits for distributed solar in 2015.

How much solar power will Mexico have by 2020?

A law requiring 35% of electricity from renewable resources by 2024 and carbon emission reductions of 50% below 2000 levels by 2050 was introduced in 2012. Combined with declining solar installation costs,it was estimated that the 2012 climate law would lead to 6 GWof solar capacity in Mexico by 2020.

What are the applications of solar energy in Mexico?

Historically,the main applications of solar energy technologies in Mexico have been for non-electric active solar system applications for space heating,water heating and drying crops. As in most countries,wind power development preceded solar power initially,due to the lower installation cost.

What is nanosun & runergy & Hyperion agreement?

This agreement between Nanosun and Runergy&Hyperion signifies the commencement of a concerted and steadfast effort to introduce the world's leading PV modules to multiple regions. With this agreement in effect,both companies are positioned to broaden their collaboration and pursue novel prospects in diverse countries across the world.
