Mexico sunny home manager 2 0

What is the Sunny Home Manager 2.0?

The Sunny Home Manager 2.0 monitors all energy flows in the home,automatically identifies potential savings and facilitates efficient use of solar energy. Intelligent energy management is thus becoming even easier and more cost-effective. Your Benefits Intelligent energy management and power measurement in a single device

What is a sunny home manager?

The Sunny Home Manager 2.0 provides some practical help in this respect. It automatically distributes the power from the roof within the household according to where you need it at that time: for washing the dishes or doing the laundry, integrating a heat pump or charging your electric car. It doesn't get any simpler or greener than this.

Is sunny home manager better than SMA energy meter?

As the firmware for intelligent energy management offers the user considerable savings and, naturally, it costs money to develop and maintain the software, the Sunny Home Manager 2.0 combined device is slightly more expensive than the SMA Energy Meter.

Why should you choose a sunny home manager?

This increases the self-consumption rate of the solar power and enables optimal use of new dynamic tariffs - all fully automatically and cost-effectively. The Sunny Home Manager 2.0 has established itself as a mar-ket bestseller, with over 300,000 installations and more than a decade of success.

How many sunny home managers are updated?

Multiple Sunny Home Managers are updated one after another. Version 1.12.17.R (July 2016) Performance features: Support of the new Sunny Boy Storage (Single unit with one high voltage storage battery) for prognosis-based battery charging and visualisation of storage data.
