Moldova battery storage sites wanted

The integration of large-scale RES installations in Moldova will require significant changes in the operational practices of the utilities. The grid will need additional flexibility in the generation ...

To improve the reliability of Moldova"s electrical grid, a new large battery electric storage system (BESS) and other additional equipment will be purchased. US Secretary of State Antony Blinken announced this today in Chisinau at a joint press conference with Head of State Maia Sandu, MOLDPRES reports.

The US government has pledged to make a USD 85-million (EUR 78.3m) investment into Moldova"s energy segment by supporting the deployment of large-scale battery energy storage capacity in the Eastern European country.

During his visit to Moldova, U.S. Secretary of State Antony Blinken announced an investment of $85 million, IPN reports. The U.S. Secretary of State visited, together with Prime Minister Dorin Recean, the power station ...

The integration of large-scale RES installations in Moldova will require significant changes in the operational practices of the utilities. The grid will need additional flexibility in the generation mix, as well as large-scale battery energy storage and efficient demand-side management tools.

The United States will allocate 85 million dollars to Moldova for the purchase of a battery energy storage system. The U.S. Secretary of State, Antony Blinken, announced this at a briefing following a visit to a power plant where batteries will be installed to stabilize the power supply system in case of need.

During his visit to Moldova, U.S. Secretary of State Antony Blinken announced an investment of $85 million, IPN reports. The U.S. Secretary of State visited, together with Prime Minister Dorin Recean, the power station in Braila.
