What is Monaco Energy Renouvelables?

To support Monaco's transition,the Prince's Government and Société Monégasque de l'Électricité et du Gaz (SMEG) pooled their skills in 2017 to create Monaco Energies Renouvelables (M.E.R.),with the aim of giving Monaco 100% green electricity production capacity equivalent to the territory's consumption.

Is biomass a source of electricity in Monaco?

Traditional biomass - the burning of charcoal,crop waste,and other organic matter - is not included. This can be an important source in lower-income settings. Monaco: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What makes the Monaco plant special?

The Monaco plant has many special features. Located in the heart of the Fontvieille district,its architectural integration has been carefully thought out: its perimeter walls are lined with soundproofingto keep noise emissions to a minimum.

How is waste treated in Monaco?

The Principality of Monaco has always sought to preserve the quality of its environment and be self-sufficient in treating its waste. As a result,the first waste recycling plant was built in 1898 on a site close to the current plant. The incinerationof waste consists of its mineralisation.

How many tonnes of waste can Monaco incinerate a year?

Commissioned in 1980,it is capable of incinerating 80,000 tonnesof waste a year,which puts it on par with other European plants. It has all the latest operating equipment and complies with European exhaust gas emission standards. The Monaco plant has many special features.
