Myanmar spark energy

Does Myanmar have a power supply gap?
Myanmar's power sector will likely continue to experience significant challenges. To sustain the current level of power supply would require adding 300-500 MW every year until 2030. Scenario analysis on the power supply-demand gap illustrates that available generating capacity is projected to not meet the growing demand.

Can power trade and imports help ease power shortages in Myanmar?
While power trade and imports could help easethe electricity supply shortages,it remains challenging under the current political circumstance in Myanmar. Myanmar's power sector continues to record losses due to a combination of several factors,including currency depreciation,increasing grid maintenance cost,and revenue decline.

Is Myanmar's power sector affected by political and macroeconomic instability?
Myanmar's power sector has been severely afectedby political and macroeconomic instability since the February 2021 military takeover. Following the significant uncertainty and volatility that characterized much of 2022,economic conditions appear to have stabilized in the first half of 2023.

Is Myanmar realigning to a new energy mix?
At the Myanmar Oil and Gas Society annual meeting on 24 January 2021,minister U Win Khaing mentioned that the country is realigning to new energy mix to hydropower 40%,solar 14%,domestic gas 34% and LNG 11%.

Can Myanmar achieve universal access to electricity by 2030?
It was made possible by atracting substantial private sector financing in power generation and increased public investments in the development of transmission and distribution system. However,the prospects of achieving universal access to electricity by 2030 have dimmedin Myanmar. The growth in access rate has slowed down since 2021.

What's happening in Myanmar's electricity infrastructure?
Source: Myanmar Institute for Peace and Security. The reported number of conflict-related incidentson electricity infrastructure has been declining following the peak in late 2021 and early 2022,but grid network capacity remains vulnerable.

Myanmar Government is also proposing to include this high-priority energy project - with an estimated investment value of USD 2.5 billion - in the list of early harvest projects of the China-Myanmar Economic Corridor (CMEC) to enhance bilateral cooperation so as to accelerate its progress. (v) Increase investments in renewable energy

Founded in 1993 by a group of Myanmar journalists living in exile in Thailand, The Irrawaddy is a leading
