The Eddi only measures grid and battery/solar power levels (assuming you have CT fitted for these), so if the battery CT is indicating 1.8 KW draw and you have 0.1Kw of generation then the myEnergi system assumes there is 1.5KW house consumption (3.2 + 0.1 - ...

Appreciate it was a vague question @Big Dunc - I suppose I was just trying to understand if Eddi"s work well alongside battery storage and in particular getting the prioritisation to work ok. Whether anyone might say that with our solar panels only having 2.14 kw capacity, that we might regret it from a ROI point of view.
