Namibia econo energy solutions

Will Namibia become a supplier of energy?
Once Namibia has successfully incubated the green hydrogen economy, it will enable the country to become a supplier of energy, rather than an importer.

Who is cleanergy solutions Namibia?
This collaboration between two solid family-owned companies stems from a shared vision to deliver a remarkable and impactful project in Namibia. Cleanergy Solutions Namibia is leading the development of a green hydrogen production plantin Namibia's Erongo region.

Can Namibia become a green hydrogen production hub?
Namibia is on the cusp of becoming a green hydrogen production hub,thanks to its abundant renewable energy resources. Cleanergy Solutions Namibia,a powerful partnership between the Ohlthaver &List Group (O&L) and CMB.TECH,is leading the charge in driving this transformation.

How will solar power benefit Namibia?
The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

Will Namibia reach net-zero emissions in Africa?
Outlined in the Harambee Prosperity Plan II,Namibia aims to become the first country to reach net-zero emissions in Africa. Since 2021,Ohlthaver &List (O&L) and CMB.TECH have been working together to leverage their unique expertise. Both companies have a history of more than 100 years of being entrepreneurial and innovative.

Does Namibia need a power trading system?
The required infrastructure for power trading already exists. About 40% of Namibia's power currently comes from South Africa and is primarily driven by coal-fired power plants. We imagine a reality where Namibia exports clean energy to South Africa thereby assisting the Southern African region to decarbonize.
