Namibia freshtec energy

Who is freshtec energy?

Freshtec Energy is a solar companyspecialising in the wholesale and retail sales of solar systems : inverters,panels,batteries and all the solar accessories to installers and to the general public. We are an Online store with a physical warehouse,where customers can come to pay and collect their orders.

How will solar power benefit Namibia?

The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

What are the main energy sources in Namibia?

Namibia's main energy sources are petroleum,hydropower,imported electricity and imported coal. Currently,less than 50% of the population has access to power. The country's traditional generation capacity consists of a mix of hydropower,coal,diesel and thermal.

Will Namibia become a supplier of energy?

Once Namibia has successfully incubated the green hydrogen economy, it will enable the country to become a supplier of energy, rather than an importer.

Is cleanergy Namibia's first green hydrogen plant?

Cleanergy,a venture between Antwerp-based shipping company Compagnie Maritime Belge SA (CMB) and local firm Ohlthaver &List Group,will be Namibia's first commercial green hydrogen plant.

How does Namibia get its electricity from South Africa?

These domestic electricity generation plants,however,supply less than one-third of power consumption. As a result,Namibia imports most of its electricity primarily through bilateral contracts with South Africa's national power utility (Eskom)and to a lesser extent,the Southern Africa Power Pool.
