Nicaragua cubic modulsystem

What is a cubic modular system?

The CUBIC modular system is based on a set of standard parts that allows you to design and construct a tailor-made enclosure that is easy and quick to assemble. The CUBIC modular system provides numerous possibilities for construction of tested panels. With the modular system, the choice of electrical components is completely up to you.

Why should you choose cubic modular?

Whenever the need for a safe and efficient power distributionis needed,the CUBIC Modular system is the answer. The modular thinking behind our signature enclosure system makes it possible to build every type of switchboard solution in the low-power segment,based on several standard parts,without compromising on quality.

What is a modular busbar system?

The modular system is supplied in parts. Using a relatively few standard parts,it is possible to build enclosures in bespoke sizes and models. CUBIC's type-tested busbar systems consist of standard components and cover a range up to 8750 Amps.

What is modular system?

The Modular System is extensively tested by leading and independent test laboratories. This ensures a high validity of our assertions and ensures a documentation and independency, on which all stakeholders can rely. The Modular System is verifiable according to the IEC/ EN 61439 standard.

What makes cubic a good panel system?

Goal-directed development has resulted in the CUBIC modular system being one of the best documentedand most tested panel systems on the market today. The documentation comprises all necessary information in connection with design,engineering and construction of panels.

What is cubic switchboard technology?

The foundation of the company's switchboard technologies stems from its initial use of a modular systemfor the creation of electrical panels. CUBIC's Modular System allows any type of switchboard type to be constructed with the option of either stainless or lacquered steel versions.

Produkter CUBIC& #039;s produktprogram består af følgende fem områder: CUBIC& #039;s produktprogram består af fem områder: modulsystem, standard- og kundetilpassede løsninger, CPS25, Cu-flex samleskinneforbindelser og elektriske komponenter og koblingsudstyr. CUBIC& #039;s modulsystem er baseret på et koncept med standardmoduler i stål til ...

Rockwell Automation, Inc. (NYSE: ROK), the world"s largest company dedicated to industrial automation

and digital transformation, announced that it has completed the acquisition of CUBIC, a company that specialises in modular systems for the construction of electrical panels. CUBIC, founded in 1973, serves fast-growing industries such as renewable ...
