How is energy used in Niger?
Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

What is the energy potential of Niger?
Niger has significantenergy potential,rich and varied,that is weakly exploited. It consists of biomass (firewood and agricultural residues,the main source used by households for cooking),uranium,mineral coal,oil,natural gas,hydroelectricity and solar energy.

What is Niger's energy mix?
Mainly used for electricity generation and transport,petroleum productsaccount for 18% of Niger's energy mix. Their share of the total has increased in recent years. Mineral coal for electricity generation accounts for the remaining balance at 3% of total energy supplies in Niger.

Who is involved in the energy sector in Niger?
The energy sector in Niger contains a multitude of stakeholders, which include government bodies and parastatal organisations, NGOs and asso-ciations as well as the private sector. Some of these play multiple roles in policy, regulation, finance, knowledge generation and advocacy.

Does Niger need reliable electricity?
The Government of Niger views providing reliable electricityand other basic energy services to all populations and parts of the country as a critical aspect of its inclusive economic transformation plans. It also recognises decentralised renewable energy options as a cost-effective alternative to grid expansion in many rural areas.

What is Niger's energy profile?
Niger's energy profile is typical of a low-income economyin that the household sector remains the main energy user. This signifies a limited use of energy in the productive sector. Households across Niger rely heavily on traditional biomass to meet their basic energy needs.

The Niger-Benin Oil Pipeline, also known as Niger-Benin Export Pipeline (NBEP), is a 1,950 kilometer long crude oil pipeline connecting oilfields near the desert oasis of Agadem in Niger to the Atlantic Ocean  ends in the Gulf of Guinea near Benin"s largest city Cotonou.The pipeline was built and is operated by the China National Petroleum Corporation (CNPC).
