Olivia energy solutions Dominican Republic

Why did the Dominican Republic build a photovoltaic plant?
The energy deficit and dependence on fossil fuelsdrove the Dominican Republic to step up its commitment to clean energy. DOMINION took on the task of building the photovoltaic plant in this Caribbean country,with an offer that included everything from the design and construction of the plant to its operation and subsequent maintenance.

What is Energas & AES Dominicana's vision for a sustainable future?
Energas and AES Dominicana shared a vision for a sustainable future in the Dominican Republic by diversifying the country's energy matrix with greener energy solutions while ensuring a strong, resilient grid.

Does the Dominican Republic need a natural gas infrastructure solution?
However, the Eastern region of the country where Energas' facility is located lacked existing natural gas networks or pipelines to transport natural gas. The Dominican Republic needed a holistic infrastructure solution to strategically shift from conventional generation to natural gas.

Does Energas use natural gas in Dominicana?
Through AES Dominicana,we introduced natural gas into the country over 20 years ago,saving our customers over half a billion dollars and avoiding four million tons of CO2 emissions every year. However,the Eastern region of the country where Energas' facility is located lacked existing natural gas networks or pipelines to transport natural gas.

Where is Energas located in the Dominican Republic?
